

# Global World & My Future Career

Let me introduce myself. My name is Kate, my surname is Vosrtikova. I'm 15 years old and I study at school 55. I'd like to tell you how I see myself in the modern world. I think I'm a friendly, active and outgoing person. I love going to parties and dancing. I'm good at acting and singing. I like going out with my friends and have some sort of entertainment as cinema, café and shopping.

My passion is traveling. Miriam Beard said, "Travel is more than the seeing of sights; it is a change that goes on, deep and permanent, in the ideas of living". I suppose These really exciting journeys give me a chance to realize myself as a part of the global world.

My special interest is language. In my opinion, only due to multicultural rapprochement between the countries, the creation of the world community on the equal rights for all nations and open international cooperation is possible. In realization of this important affair it is certainly impossible to dispense without the interpreter's services which becomes the peculiar bridge between the countries. And though it is considered that the interpreter is only the intermediary, he is able to make the dialogue between the countries more effective and simple.

In my opinion the profession of an interpreter is one of the most important and indispensable in the present-day business world. All large transnational corporations which have their sister companies all over the world implement their business-like co-operation with the help of interpreters. The interpreter plays a role of an instrument with whose help business negotiations precede in the most effective way.
